In the B-2700 block, foreman, Jose Vargas, along with superintendent, Scott Martin, and employee, Ignacio Gonzalez, were looking at the best way to place a pipe in the pipe rack. Jose Vargas noticed that if only one strap was to be used it would put Gonzalez in the line of fire without an escape route. Scott, Jose, and Dow employee, Morris Gilliam, stopped the job, decided to cut the pipe, and install a flange making it into two pieces and a safe lift.
